

BuddyTalk BT110

An Amazon AVS Certified Intelligent Speakerphone and Smartspeaker for Homes and Workplaces

KEY FEATURES and BENEFITS

- Flexible user interface for voice calling
 - **Convenient Call Control** using voice commands, a built-in touch panel, an external tablet controller, BuddyTalk smartphone app, or a standard telephone
 - **Multiple voice interfaces** with hands-free speakerphone, and smartphone or POTS-based private mode
- Broad suite of Amazon Alexa™ Voice Service (AVS) smartspeaker features
- Amazon Alexa Communication (ACM) integration
 - Alexa-Native Calling configured to allow a VoIP subscription for incoming and outgoing calls
 - Alexa-to-Alexa, Skype, Messaging, Drop-ins, and Announcements
- Superior voice quality with high-quality wideband codec, network impairment handling, and advanced acoustic processing
- Secured communications covering voice commands, call signaling, and voice media
- Flexible network deployment: Ethernet and WiFi for network redundancy, dual-homed mode for disjointed voice and data networks, VLAN tagging for VLAN-based traffic separation, and VPN for enterprise network traversal
- Enabling VoIP by either configuring the BT110 as an IP phone extension to an existing IPPBX or subscribing to an external VoIP service
